Applicant's election of yoghurt in the reply filed on 4/4/06 is acknowledged. Because applicant did not distinctly and specifically point out any errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12, 14, 15, 20-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Park.

Park teaches a calcium fortified yoghurt (abstract). The claimed printed matter is not a patentable limitation. In re Ngai 217 USPQ 401, 404 (Fed. Cir. 2004).

Applicants cites MPEP 2112.01 III for the proposition that printed matter functionally related to a composition can distinguish the composition over the prior art and then assert that such a functional relationship is present. However, the MPEP further states that the critical question is whether there exists any new and unobvious functional relationship between the new matter and the substrate. The examiner cites Skinner et al as extrinsic evidence that a diet high in calcium causes a reduction in body fat content (see abstract). Applicants' instructions are a method of using which is obvious in light of Skinner et al. Thus, although the asserted relationship may be present, it is obvious and, therefore, does not render the claim patentable. Applicants'

submissions, discussed on pages 8-9 of their response on 4/4/06, are deemed to support utility rather than unexpected results.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-28 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 8-10 of copending Application No. 10/827801. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the claims of '801 regarding the type of food.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented. Per MPEP 804 I.B.1., cited by applicants, the examiner will maintain the instant rejection and will not make one in '801

The abstract of the disclosure is objected to because it does not describe the claimed article of manufacture, but rather methods of use. Correction is required. See MPEP § 608.01(b). Applicants appear to have inadvertently overlooked the objection in the response of 4/4/06.)

No claims allowed.

The examiner notes that the claims filed 4/4/06 in this application and 10/827353 contain lined through withdrawn claims, which do not appear to comply with 37 CFR 1.121 effective 7/30/03,

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
